

EASY LOCK ACTION!

80 & 70 Series

ALL-ENVIRONMENT VINYL WINDOWS

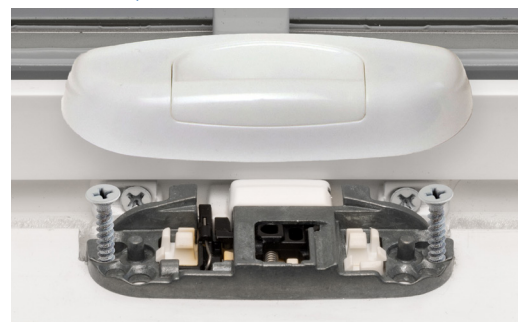

NEW PAL (Positive Action Lock) OPTION

No need to wonder if your windows are closed and locked. With a single motion, our new PAL lock option automatically locks the window when fully closed. As the moving sash closes, the locking mechanism is engaged by the keeper and locks the window closed.

- Heavy-duty design incorporates more metal surrounding the lock actuator, ensuring increased stability for better, more consistent operation
- Endurance tested to over 36,000 operating cycles
- Passes forced entry requirements for sliding and hung windows
- Stainless steel springs resist effects of coastal or humid environments
- PAL can be converted to an ADA PAL lock by replacing the cover
- Available on 80 and 70 Series sliding and single-hung windows

Smooth, Sleek Cover

The low-profile cover conceals the screws that secure the locking mechanism to the reinforced sash, creating a clean, elegant aesthetic with no unsightly screws.

New ADA PAL Option

Our ADA PAL option features a matching cover design, with an adjustable pull cord to disengage the lock for easy operation and ADA compliance.
